

Security Incident Report

Incident ID: SEC-2026-119

Date:

2026-05-11

Summary:

Multiple failed login attempts were detected from external IP addresses targeting internal admin systems.

Affected Systems:

- Internal Authentication Server
- Monitoring Dashboard

Resolution:

Temporary account lockout policies were activated.

Root Cause:

Weak password reuse by multiple employees.

Recommendations:

- Enforce MFA
- Rotate credentials every 90 days
- Improve phishing awareness training
